

**Art Page For Grades 10, 11, or 12 Only.** Coalition to Save the Menominee River Art Contest 2019 (Use our other pages for the other grades\*.)

Print Child's name:		Was in Which School Grade in May 2019?: ___	
Print Parent's name:		Address:	
City:	State:	Zip:	Phone: (    ) -
Parent's e-mail:			
Parent's signature means you agree to all contest rules:			Date:    /    /2019

Full OFFICIAL Rules found at: <http://jointherivercoalition.org/> or at 1<sup>st</sup> St. Menominee Summer Farmer's Market Booth Saturdays 9a – 12n.

U.S. Environmental Protection Agency (EPA) states mining is the most toxic industry we have. There has never been a sulfide-bound mineral mine that has *not* polluted. Aquila proposes their lethally toxic “tailings” dam (millions of tons of mining wastes) be the cheapest and most often to fail kind. A [2017 U.N. report](#) states catastrophic spills are *increasing*, as mining companies seek to lower costs and increase profits. Watch this video of recent Canadian similar mining tailings dam fail: <https://www.youtube.com/watch?v=VYYwzAvQIF8>

The Menominee River is the largest watershed in the U.P. with 4,000 square miles that drain into Lake Michigan. The Great Lakes contain 21% of the world's fresh water. MI & WI DNRs have worked to make the Menominee River good for sturgeon. Almost half of Lake Michigan Sturgeon use only the Menominee River for spawning.
